

Evangelos Pastelakos is an economist and holds a PhD in Economics. He studied Economics at the University of Portsmouth and the University of Edinburgh, and completed his doctoral studies at the Athens University of Economics and Business.

He has extensive teaching and research experience in higher education. He has taught at the Department of Sport Management at the University of the Peloponnese, the MSc Programme in International and European Economic Studies at the Athens University of Economics and Business, and the National Centre for Public Administration and Local Government. At the Athens University of Economics and Business, he has supervised a number of postgraduate dissertations and has received two commendations for teaching excellence. His teaching activity covers subject areas related to economics, entrepreneurship, and innovation.

His research interests focus on sport management, innovation, and entrepreneurship. His research examines, among other topics, the relationship between innovation, business strategy, and international competitiveness, as well as the economic, social, and developmental impacts associated with sport and sport events. He has published research articles in academic journals and has presented research findings at national and international academic conferences.

He has participated in numerous funded academic research projects and has considerable experience in the design and implementation of research programmes, data collection and analysis, the preparation of research reports and studies, and the use of research findings to support decision-making. He has held a postdoctoral research fellowship at the Athens University of Economics and Business and has also served as Principal Investigator of a multi-year research project funded by the Hellenic Foundation for Research and Innovation (HFRI). In parallel, he has professional experience in the private sector and has contributed to the development and implementation of research and consultancy projects linking academic research with issues of economic policy, business development, and management.
